PROFESSIONAL MASTER'S-LEVEL PROGRAMME · ADMISSIONS 2026 – 2027

Masters in Sustainability & Environment

Build the knowledge and practical skills to lead environmental, ESG and climate initiatives — studied fully online, at your own pace, alongside your career.

12–24 Months	1 Live Class	100% Online	DBS Certificate
LEARNER-PACED DURATION	EVERY WEEK	LMS-BASED LEARNING	DUNSTER BUSINESS SCHOOL, SWITZERLAND

Certificate awarded by **Dunster Business School, Switzerland**. Programme delivered and supported by **Bramosh Global Institute OPC Private Limited**, an approved educational partner of Dunster Business School.

ABOUT THE PROGRAMME

Shaping professionals for a sustainable future

The **Masters in Sustainability and Environment** is a professional, career-focused Master's-level programme awarded by **Dunster Business School, Switzerland**, and delivered online by **Bramosh Global Institute**.

The programme brings together environmental science, climate action, ESG strategy, circular economy, renewable energy and sustainable finance. Learners develop the ability to understand environmental challenges, interpret global frameworks such as the UN Sustainable Development Goals and the Paris Agreement, and apply practical solutions in businesses, NGOs and public organisations.

Study is fully online and flexible. Learners complete the programme in **12 months to 2 years**, depending on the pace at which they submit and complete their assignments, and join **one live interactive class on Environmental Sustainability every week**.

WHY SUSTAINABILITY & ENVIRONMENT

1. **Growing demand for expertise**
   Organisations worldwide are building ESG and sustainability strategies and need skilled people to lead them.

2. **Wide career scope**
   Relevant to corporates, consultancies, NGOs, government agencies and research organisations.

3. **Global priorities**
   Address climate change, carbon reduction, resource efficiency and sustainable urban development.

4. **Practical, applied learning**
   Work on real-world assignments, case studies and a final research project.

Programme status — please note: This is a professional Master's-level programme awarded by Dunster Business School, a private business school in Switzerland. **It is not a university degree.** Learners who plan to use the qualification for government employment, admission to a university programme, or immigration purposes should confirm its acceptance with the relevant authority or institution in advance.

AWARDING INSTITUTION

About Dunster Business School, Switzerland

Dunster Business School (DBS) is a private business school registered in the Canton of Zug, Switzerland, under the leadership of its President, **Mr. Philippe Thevenot**. The school offers Diplomas, Bachelor's, Master's and Doctoral-level programmes, short courses, language courses and professional certifications to learners around the world.

Its core values — **Innovation, Integrity, Excellence, Sustainability and Global Perspective** — guide its curriculum and its practical, career-oriented approach to education.

DURATION & LEARNING MODE

Flexible study, built around your schedule

12 – 24 Months
Complete at your own pace. Your duration depends on how quickly you complete and submit your assignments.

1 Class / Week
One live, interactive online class on Environmental Sustainability every week.

24 × 7 LMS
Study materials, recorded classes, assignments and assessments on the Learning Management System.

PROGRAMME HIGHLIGHTS

Learner-paced completion
Finish in as little as 12 months, or take up to 2 years.

Weekly live sessions
Interact with the trainer, ask questions and discuss real cases.

Industry-relevant curriculum
Aligned with UN SDGs, the Paris Agreement and ESG practice.

Choice of specialisation
ESG, Climate Policy & Law, or Renewable Energy & Climate Tech.

Assignment-based assessment
No high-pressure exams — progress through practical assignments and projects.

Swiss certificate
Certificate awarded by Dunster Business School, Switzerland.

LEARNING OUTCOMES

- Understand environmental science, climate change and sustainable development practices.
- Lead sustainability initiatives in businesses, government bodies and non-profits.
- Analyse global and local environmental policies and regulations.
- Apply knowledge of renewable energy, circular economy and green innovation.
- Use sustainability data and carbon footprint analysis for informed decisions.
- Integrate ESG principles into business strategy and reporting.
- Address the ethical dimensions of environmental issues responsibly.

CURRICULUM

Programme Structure

The programme is organised in four stages. Learners move through each stage at their own pace by completing the assigned coursework.

01 Sustainability Fundamentals

Principles of Sustainability & Environmental Science

- Sustainability & ecosystem services
- Environmental challenges & climate change impact
- Global frameworks: UN SDGs, Paris Agreement

Environmental Policy & Governance

- International climate policies & agreements
- Regulatory compliance & environmental law
- Sustainability leadership & governance

Research Methodology & Academic Writing

- Qualitative & quantitative research methods
- Data collection & sustainability metrics
- Academic writing & research ethics

Sustainable Business Strategies & ESG

- Corporate sustainability & ESG reporting
- Sustainable business models & green innovation
- Impact investing & CSR

Circular Economy & Resource Management

- Waste management & recycling innovations
- Sustainable supply chains & green logistics
- Circular economy strategies

02 Applied Sustainability & Innovation

Renewable Energy & Green Technologies

- Solar, wind, hydro & bioenergy
- Energy policy & energy transition
- Smart grids & energy storage

Sustainable Finance & Green Investment

- Green bonds, carbon markets & climate finance
- Sustainable banking & ESG investing
- Risk analysis in sustainable finance

Capstone Assignment – Industry Sustainability Challenge

- Case study based on a real organisation
- Applying sustainability theory to real problems
- Presentation & impact assessment

Climate Change Mitigation & Adaptation

- Carbon footprint & net-zero strategies
- Climate risk & resilience planning
- Environmental impact assessment

Sustainable Urban Development & Smart Cities

- Eco-cities & green infrastructure
- Sustainable transport & urban planning
- Water & waste management in cities

03 Specialisation (choose one track)

TRACK 1

Corporate Sustainability & ESG

- ESG strategy & reporting standards
- Corporate environmental ethics
- Sustainable procurement & stakeholders

TRACK 2

Climate Policy & Environmental Law

- Global environmental governance
- Environmental justice & human rights
- Legal frameworks for sustainability

TRACK 3

Renewable Energy & Climate Tech

- Advanced renewable technologies
- Climate-tech start-ups & innovation
- Energy transition policies

Applied Project

- Practical, research-based project on a sustainability issue of the learner's choice, with an industry-style report and impact evaluation

04 Research & Final Project

Final Research Project (Dissertation)

- Independent research in sustainability & environment
- Data collection & analysis
- Final submission & presentation

WHO SHOULD ENROL

- Working professionals moving into sustainability, ESG or environmental roles
- HSE, quality, CSR and compliance professionals
- Managers responsible for ESG reporting or green initiatives
- Engineers and technical staff in energy, construction, manufacturing and utilities
- NGO, development-sector and public-sector professionals
- Entrepreneurs building sustainable or climate-focused businesses
- Graduates seeking a career in the green economy

ELIGIBILITY

- A Bachelor's degree in any discipline, **or** a diploma with relevant professional experience
- Working proficiency in English (the language of instruction)
- Access to a computer or smartphone with a stable internet connection
- Final admission is confirmed after a counselling session and document review

How you will be assessed

Assessment is assignment-based: module assignments, the capstone assignment, the applied project and the final research project. You progress as you complete and submit each assignment.

YOUR LEARNING JOURNEY

From enrolment to certification

01

Counselling & Registration

Speak with a Bramosh Global counsellor, submit your documents and register for the programme.

02

Attend & Learn

Join the weekly live class and study on the LMS with recorded sessions and materials.

03

Complete Assignments

Submit module assignments, projects and your final research project at your own pace.

04

Receive Certificate

On successful completion, receive your certificate from Dunster Business School, Switzerland.

TEACHING METHODOLOGY

1 — Live interaction
Weekly trainer-led sessions with discussion and Q&A.

2 — Case-based learning
Real-world examples from industry, NGOs and government.

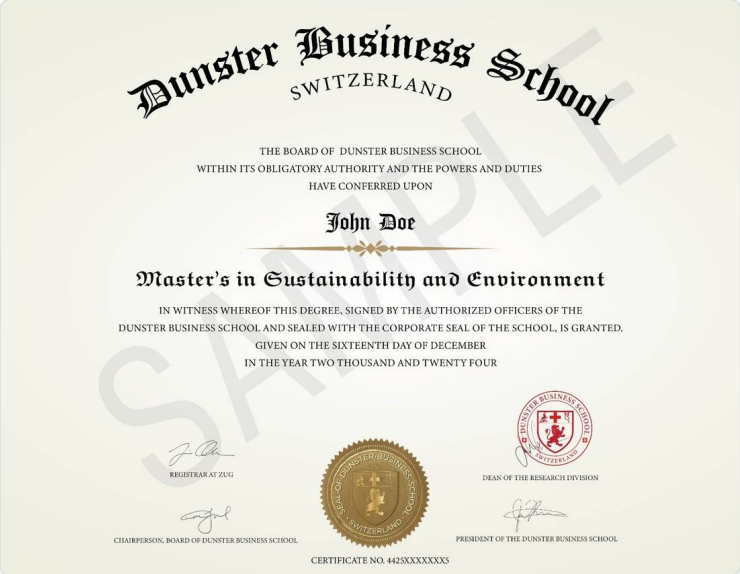
3 — Project work
Assignments that build practical, workplace-ready skills.

CERTIFICATION

On successful completion of all assignments and the final research project, learners are awarded a certificate for the **Masters in Sustainability and Environment** by **Dunster Business School, Switzerland**.

The certificate can be added to your CV and LinkedIn profile to demonstrate your specialised knowledge in sustainability and environmental management.

Reminder: this is a professional Master's-level qualification from a private business school, not a university degree.



Sample certificate — for illustration only. Your certificate will show your own name and date of award.

"Our mission is to globalise the integration of education and profession, empowering individuals with internationally recognised credentials for lifelong careers."

Mr. Amardeep Mishra — Director, Bramosh Global Institute · PECB Certified ISO 45001 Lead Auditor · OTHM-Approved Trainer
